Recruitment Test - Web

This test aims at evaluating your knowledge of the basics of AngularJS, javascript, HTML5 and CSS3.

You have half a day to create a web page and display some data from an API.

In this test we will pay attention to the structure of your code and your capacity to respect a design. If you cannot do everything, do less but do it right.

You have to design the page here-below. The page has to be responsive.

You will find all the images and icons in the folder « resources ».

Colors

- Orange : #E77814
- Dark blue: #323b46
- Light gray : #c7c7c7
- Dark gray : #393939

Font : « Open Sans » <https://www.google.com/fonts/specimen/Open+Sans>

1. Data to display

For the data to display, you can use the API (api.themoviedb.org). You can see the API documentation in the following website: <http://docs.themoviedb.apiary.io>
The key API is 4b5769d9c114b4c008e50bc35c1d64f8)

We can use every data from the api and display it where you want on the page. We just want to check if you can use an api.

2. Menu

All the items in the menu must redirect to a blank page except « Manuels ». Don't bother with the orange effect when an item in the menu is active, let it gray.

3. Task list

The task list must be scrollable.

1	Titre de l'étape 1 Aperçu de la description de l'étape 1	>
2	Titre de l'étape 2 Aperçu de la description de l'étape 2	>
3	Titre de l'étape 3 Aperçu de la description de l'étape 3	>
4	Titre de l'étape 4 Aperçu de la description de l'étape 4	>
5	Titre de l'étape 5 Aperçu de la description de l'étape 5	>
6	Titre de l'étape 6 Aperçu de la description de l'étape 6	>
7	Titre de l'étape 7	>
